

Modular Access Chambers for New Sites

Quadbox™ is the modern alternative to brick built and concrete chambers on new sites providing contractors with a means of constructing access chambers quickly and inexpensively, whilst offering improved build quality, reduced defects and enhanced site safety performance.

Quadbox is the **only** modular access chamber approved for use on BT Openreach networks and is also approved by a wide range of other utility providers in the telecoms, water, gas and electricity sectors

The lightweight system is supplied as 150mm deep twinwall rings which are simply stacked on a prepared base and backfilled with suitable as-dug or type 1 material

Available Size Range

Product Code	Clear Opening
MJF102	725 X 255mm
MJF104	915 X 445mm
MJF106	1310 X 610mm

Other sizes are available on request

Duct Entries

Duct entries can be cut as and where required using a holesaw mounted on a cordless drill

The chambers incorporate guides which identify drilling points to ensure correct duct spacing

Furniture

Cable Brackets, Bearers, Pins and Steps (where required) are supplied in a bagged kit and easily slot into purpose designed pockets in the chamber

Benching

Where required rings can be cut to bridge over or around existing telecoms plant or immovable obstacles

Quadbox Advantages
